CRYPTO DOCTORCOIN

Your doctor can provide an important service for you and your family. Medical and health care is of paramount importance for people of all ages when necessary. Having local doctor services or local doctor treatment is vitally important for people all across the globe.

Imagine a future with cryptocurrency Doctorcoin

We envision a time in the future where you can go into a doctor office and use cryptocurrency Doctorcoin to pay for some or all of your doctor bill. At least, providing people with that option we feel would be an amazing achievement. Doctorcoin can play an important role in connecting doctors and patients by allowing patients to pay for medical services using Doctorcoin.

Doctorcoin has been built for all. Since almost all of us will need to see or visit a doctor at some point in our lives. DoctorCoin is the ultimate doctor service cryptocurrency. DoctorCoin is connected to numerous health care platforms, blogs and other health care outlets to hopefully bring maximum awareness to people all over. We hope that you join our community. Join us in the exciting endeavor!

Cryptocurrency Doctorcoin, the right crypto at the right time!

SIMPLE EQUATION – CRYPTOCURRENCY DOCTORCOIN

Doctors provide perhaps the most important service for any human being. As we know, many doctors provide medical services that can mean life or death. The one thing that is troubling, is that the cost to visit local doctors has gone up tremendously in many countries.

We believe this is where DOCTORCOIN can be an excellent innovation to possibly bring down costs and increase access to doctors. Not all doctor visits are life and death. There are many types of doctors. Doctors can provide many types of cosmetic and enhancing treatments for people. This and other areas are where DOCTORCOIN can play an important role in connecting doctors and patients.

ALTERNATE CRYPTOCURRENCY DOCTORCOIN PAYMENT

Your doctor or doctor office fees can be very high. Some people who have elective surgeries or doctor treatments pay through a variety of methods.

We feel that a decentralized crypto Doctorcoin can be an alternative payment option for doctors and patients. Of course, this is to be worked out through them. We feel the open nature and not having a third party to dictate terms can be beneficial. This crypto blockchain can potentially benefit both patients and doctors.

AMBITIOUS AND SIMPLE EQUATION - DOCTORCOIN FOR DOCTOR SERVICES!

When visiting a local doctor, the costs can be high. There are many doctor services that are not covered by any sort of insurance. DoctorCoin can be a way of meeting this challenge, by having people pay part or all of their costs with Cryptocurrency Doctorcoin. Our vision and goal is for people to use Doctorcoin now and in the future when visiting their local doctor.

All for one and one for all! Many types of Doctors:

We believe cryptocurrency Doctorcoin can serve many needs. For one, there are many types of doctor offices. From veterinary doctors, to chiropractic doctors, acupuncture doctors and so forth. DoctorCoin can be the leader in connecting doctors and people.

OUR MISSION - ALL PEOPLE IN NEED OF A DOCTOR, SHOULD HAVE ACCESS TO A LOCAL DOCTOR!

Our mission is to provide more access to doctor services for more people. We believe that a Doctor Service Crypto Coin such as DoctorCoin can help with potentially reducing medical and health care costs by reducing transaction fees and providing an alternative in doctor service payments.

We want to work hard so that DoctorCoin is available for people all over the world. Part of our mission is that we want DoctorCoin to provide some charity and benefit for those that need to visit doctors.

Our DoctorCoin team hopes to give back and help people needing doctor services. We will be looking for creative ways in giving back and paying it forward. Doctor services should be available for all who need it. Crypto Doctorcoin can perhaps be the engine that propels a solution for this need.

OUR VISION - MORE DOCTOR ACCESS AND A HEALTHIER SOCIETY!

DoctorCoin has been built with a true vision for the growth of health and medical care in the future. As we know, Doctors are the key to a satisfactory health care system.

Without the Doctor examining and studying the patient's medical history and doing a thorough examination - the treatment can not be done. Of course, the doctor needs a team of nurses, and staff to complete the treatment.

With DoctorCoin, our vision is to create the ultimate health care / doctor cryptocurrency - using decentralized digital finance. We want many people using and enjoying DoctorCoin for their various health care needs and more.

SCOPE – MANY DOCTOR SPECIALTIES THAT HELP PEOPLE GET THE CARE THEY NEED.

There are many specialties in various categories that have the title of being a doctor. We hope that all doctors and doctor practices accept the cryptocurrency Doctorcoin.

Here are some:

- Acupuncture
- Chiropractor
- Dentist
- Medical Doctor / Physician
- Veterinarian

We hope all of these will accept Doctorcoin at their doctor practice. The healthcare industry consumes over 10% of the GDP of most developed countries. With some countries, even much more.

Up to 8.3% of the US adults aged 18 and over failed to receive healthcare services due to financial problems in 2019, according to a report by the CDC.

For poor countries with a per capita GDP of less than \$500 per year, donor funding accounts for approximately 45 percent of the health expenditure.

THE POTENTIAL OF THE UNKNOWN

In the last 30 or 40 years, the innovative “unknown” in technology ended up being where most of the profit and growth were. Just think of mobile phones with Apple, social media Facebook and online search with Google. All of these had a lot of unknown. But vast industries have grown around these technologies.

Almost all will agree that Web 1.0 and Web 2.0 created many of the biggest opportunities in the last 30 years. There is a reason we use potentially or possibly, as there are still a lot of unknowns. There will be more evolution of the blockchain crypto technology in the coming years. There is also a regulatory overhang. Currently most legal minds like us do not consider most decentralized cryptocurrency companies as a security, rather a utility token. A security by nature needs a company, bylaws, etc.

We believe in the decentralized model and have structured ourselves that way. If the cryptocurrency can perform services, then we believe a community will grow around it. We ask that you use your best judgement and follow local jurisdiction laws (as confusing as they may be).

Cryptocurrency and the blockchain as we will discuss, are part of Web 3.0 answer believe like the consensus, that this is the future. Web 1.0 and Web 2.0 changed everything as far as business and finance goes. Web 3.0 is the next iteration and provides our crypto Doctorcoin huge potential upside.

Embracing Decentralization:

We feel we have positioned ourselves as good as any to succeed with any iterations. A crypto Doctorcoin will be needed. We believe our group of independent platforms will help propel Doctorcoin. Our various platforms are not the same entity, but share the same end goal. We have made this as decentralized as possible. Our feeling is like most cryptocurrencies such as Bitcoin and Ethereum - you should let the community allow the crypto to grow. There should be no central body dictating everything. There does need to be a foundation and concerned group of founders who will push the vision and the technology with all that they have - and we have that. We feel a strong bond to any who will join us. Our goal is to make this as successful as possibly, with the understanding that there will be ups and downs - as with any newer technological innovation.

DOCTORCOIN FOR ALL ACROSS THE GLOBE!

To be or not to be? DoctorCoin goals and reason for being. We believe that doctor and health care costs are too high and we may offer a possible solution by offering a specific DoctorCoin cryptocurrency for doctors and patients. With Doctorcoin, we believe it can possibly be the catalyst to lower costs due to many reasons.

We would like to provide options for doctors and patients to have a cryptocurrency blockchain mechanism via Doctorcoin for payment for services. This is an option that the parties can use. Doctorcoin can use legacy medical, health, and doctor sites that our founders have built over the last decade-plus. Additionally, we plan on working with other cryptocurrencies, crypto exchanges, and crypto experts to potentially multiply the effectiveness of our Doctorcoin.

We believe we should keep it simple - Doctorcoin says it all. Doctorcoin has immense potential over the long term in potentially being a catalyst in many ways for innovation in the doctor care space. Our concept and vision are fairly simple, but the structure that we have built is powerful & well thought out. We hope and believe people will share our vision and goals, and will want to join our community. Hence we say - to be is better!

BE FLUID MY FRIEND - GROWING AND ADAPTING AS NEEDED:

Our team has built a decentralized cryptocurrency mechanism that is backed by many years of building powerful online search platforms and more. We believe any innovative technology should adapt, bring new features, and grow as needed. All who join us should understand that the world of cryptocurrency and blockchain is rapidly evolving. We will be doing so as needed.

THE MULTIPLIER EFFECT!

Having a group of cryptocurrencies, online search platforms, blogs, AI chat technology, virtual doctor technology, a large network of professionals built over the last 14 plus years, and various tech groups to work together provides a unique ability to grow. We are in it to win it! Of course, there are still a lot of challenges and risks - but if there is any group that can succeed, we believe it is us.

THE IMPORTANCE OF TELEMEDICINE

A Futuristic Approach to Healthcare with Crypto Doctorcoin:

Health consultations are being provided to patients online during the pandemic, and more and more online and digitized means of communication spring up to connect doctors to patients with every passing day. Virtual telemedicine consulting with doctors has grown immensely during COVID. Many of these can cost money, for those that do not have medical insurance.

This is where Doctorcoin can add some benefits. We feel Doctorcoin can potentially be used as a part of the payment for telemed services. We have built and networked with a dental telemedicine platform called Teledental.com - a premier and innovative dental telemedicine platform that has built its own virtual technology. We are looking to expand, grow and innovate more in this space.

THE REVOLUTIONARY BLOCKCHAIN TECHNOLOGY FOR DOCTORS AND MEDICINE

As blockchain transforms the field of finance completely, it has also created links with several other industries. Healthcare and medicine are one of those industries in which added convenience, efficiency, and transparency would be highly prized benefits brought by telemedicine powered by blockchain and cryptocurrency. Many consider the decentralized crypto blockchain as the Web 3.0 for us now and going into the future.

WHAT IS WEB 3.0?

Web 3.0 by most is described as the next iteration of the internet with a big focus on decentralization. Using more level transparency (through public ledgers for example) and not using centralized organizations. Most believe this will require smart contracts and a level of automation that would hence require cryptocurrencies. The idea is for more people to have access to the data and provide some sort of a level playing field. We believe with doctor and health care services this can potentially be vital. As one of the vanguards, we feel cryptocurrency Doctorcoin can perhaps lead the way.

DoctorCoin aims to make medical care available to everyone with the added benefits of blockchain both on the doctors' and the patients' side. Cryptocurrency and Decentralized Finance are the trends of tomorrow – making financial transactions much more efficient. The introduction of this advanced technology can reduce the management burden on many kinds of medical organizations. It can make financial management easier for patients and help them pay their bills at their convenience and through their crypto funds. The transactions will be using a cryptocurrency decentralized blockchain mechanism, which has been shown to be transparent and secure.

CRYPTOCURRENCY DOCTORCOIN BENEFITS:

Our Cryptocurrency DoctorCoin Tokens are ready for use. They are available both in the Ethereum Etherscan network and the Binance BSC-scan network. We have purposefully built in a relatively smaller number of DoctorCoins so that the value appreciation can happen. Rather than having an endless supply, we have limited the supplies.

We feel that the limited numbers of DoctorCoin will help more people want to acquire and hold it for longer periods. One of the goals of Doctorcoin is to provide a charity mechanism and some way of giving back to those needing doctor care. Our goal is that the holder does receive some rewards.

- Bring cryptocurrency blockchain technology for doctor care.
- Doctor services and visiting local doctors can be expensive with many layers.
- Decentralized cryptocurrency uses no intermediary.
- Possible cost reduction for people visiting local doctor offices.
- Transactions keep a public ledger.
- Once you do the transaction, you can not corrupt the blockchain as far as we know.
- Using a cryptocurrency for payment for doctor services can be an attractive benefit for both patients and doctors.
- Potential more transparency into medical and doctor care costs.
- Many more benefits which we hope to see on our journey. We want to bring more innovation into the cryptocurrency blockchain space.

POTENTIAL BENEFITS AND CHALLENGES FOR DOCTOR CARE – CRYPTOCURRENCY DOCTORCOIN, THE RIGHT CRYPTO AT THE RIGHT TIME!

A small seed can become a blooming fruit tree that can feed many people. Potential is the capacity to develop into something. Many new technologies were visions and goals with lots of potential that became a reality. Benefits can translate into an advantage or a profit gained from something.

There are big challenges, but we feel we have the right concept and network to get this done. Health care, medical care and doctor care services definitely do need some cryptocurrency blockchain mechanism to move it forward. We believe Doctorcoin will be one of the leaders of this space.

We believe our journey has much potential for success and can help bring more benefits to the doctor care service space that is needed.

DOCTORCOIN TOKENOMICS

Users will have full control over their smart wallets through which they can complete transactions using DoctorCoin without any intermediary– it is completely decentralized as a cryptocurrency.

Listed below are the DoctorCoin cryptocurrency Tokenomics:

- Etherscan Link =
<https://etherscan.io/address/0x864F0520836E50143763FF03f4D9aBf9b60d09Fd#contracts>
- Binance Link =
<https://bscscan.com/address/0x9eff574e5fa37afba8b71447a0fb14eb609b1612#code>
- Name = DoctorCoin
- Symbol = DOCT
- Supply = 4,210,000,000 (4.21 Billion) on each platform.

We are looking for top crypto exchanges to be listed on. We will have various mechanisms to help both holders of DoctorCoin and charities. We want people holding Doctorcoin to benefit and also, part of our mission is to give back and help people get the doctor care they need.

DOCTORCOIN USES LONG TERM STRATEGY WITH BIG SHORT TERM GOALS:

Crypto Doctorcoin Timeline

2017-2021

- Analysis of decentralized cryptocurrency doctor health care coin services.
- Concept analysis to work with all of our health care platforms. We decided not to do an ICO in 2017.

3rd Quarter 2020

- Analysis of decentralized crypto utility tokens for services and team buildup for buildout.

First Quarter 2021

- Final R&D and start to work on implementation of a cryptocurrency strategy.

3rd Quarter 2021

- July 2021, was when cryptocurrency DoctorCoin (DOCT) was created. Ready for use.
- Limited brand awareness campaign.
- Networking with health care groups and professionals.

4th Quarter 2021

- Increasing awareness and marketing of Doctorcoin. - Using our own network of doctors, health care workers and cryptocurrency experts getting feedback.
- Completion of white paper (progress and edits, as needed).

First Quarter 2022

- Increased awareness of Doctorcoin through more social media and marketing. Full announcements.
- Get listed and available through crypto exchanges. - Increasing number of people using and doctor offices accepting Doctorcoin.
- Announce our formal team, and perhaps a Doctorcoin foundation to help promote it.
- Work with other cryptocurrencies and crypto companies.

Second Quarter 2022

- Blockchain crypto innovation.
- Partnerships with health care organizations.
- Increased acceptance of Doctorcoin crypto at more doctor offices.
- Build more brand awareness.
- Work with more health care and doctor platforms.

DOCTORCOIN – CRYPTOCURRENCY BENEFITS:

As with everything related to technology, cryptocurrency like DoctorCoin brings with it its own risks and benefits that can influence its users. However, the risks associated with blockchain have been far outweighed by its benefits.

It is much more transparent due to complete encryption and decentralization. With this, a larger number of companies worldwide have adopted cryptocurrency, and thus DoctorCoin might be the revolutionary medical cryptocurrency that starts the gradual change from ambiguous and unreliable to transparent and decentralized for the healthcare industry.

Efficiency is one of the reasons why cryptocurrency has received such widespread acceptance and become so popular as an alternative to contemporary finance. Where bank transactions can take hours to days, DoctorCoin can solve the problem in potentially seconds.

New capitals and liquidity pools will become accessible for healthcare organizations looking for a way to invest in more income streams and gain added profits by putting modern technology to good use.

With end-to-end encryption and anonymity where required, these transactions are completely secure for companies that want to maintain a transparent credit profile and keep budgeting easy and simple.

It reduces the management burden and allows organizations to grow by investing their resources in new ventures – enabling scaling and increased growth without compromising quality.

TEAM

"Individually, we are one drop. Together, we are an ocean." Ryunosuke Satoro

Our goal is to have people be part of our Doctorcoin team who share a passion for innovation, want to make cryptocurrency Doctorcoin available everywhere, believe in the decentralized crypto Web 3.0 that empowers people, giving back and making doctor services more readily available for people.

Doctorcoin team consists of healthcare professionals, doctors, online marketing, technology and crypto experts.

The team is led by founder Dr Ed Said, DMD - A USA based doctor, search engine, and online technology pioneer. Over the last 14 years, he has been CEO of online technology companies. He has over 15,000 LinkedIn connections with many of the leading experts across many industries. <https://www.linkedin.com/in/dr-s-said/>

We have many contributors and people wanting to join us, and share our vision. We will be adding more people to our team in the upcoming weeks and months.

We will be adding more people to our team in the upcoming weeks and months. We will most likely build a Doctorcoin foundation to promote and build awareness of crypto Doctorcoin. We will do a formal team announcement after this.

COMPANY AND COMMUNITY

We are a USA-based company. Currently using our Teledental inc., in Delaware.

We are a decentralized platform, hence our goal will be to create a Doctorcoin foundation after crypto listings and success.

We will do a formal team announcement after this. We look forward to building a truly global community to help us tackle this global challenge we face with health care and doctor services.

We are inspired by the no name and decentralized Bitcoin model. The idea and vision of true decentralized cryptocurrency is more important than the personality. Like Bitcoin, we hope to build an avid community who will push Doctorcoin to greater goals and reach.

GIVING BACK

The best part of building wealth and success is giving it away!

Our team is passionate, hard working and innovative. We believe in our vision. Part of the TEAM goal is to give back. We will do some announcements after participating on more crypto exchanges. We hope to give back to health community centers, doctors who we feel are innovating in health care, various groups supporting the crypto vision, various water related solutions, and help businesses suffering from the global pandemics somehow. We will also listen to suggestions from our Doctorcoin community. Potentially, we may do a one for five - where about 20% of all the crypto will be given away by our team or we will find some other mechanism to give back.

We feel this will help potentially build awareness, bring more value to crypto Doctorcoin, and help people, businesses & groups that can make our world a better place.

NETWORK EFFECT:

Sometimes it is who you know, more than what you know is an old adage. We believe it is important who you know and what you know.

The network effect as far as economics and business is concerned, is when more people become aware and use a product - the more valuable the product becomes.

As we have discussed, Doctorcoin has a strong group of online doctor platforms, cryptocurrencies, blogs, technology pros, cryptocurrency experts, health care professionals, and various health care businesses to help propel Doctorcoin - with the help of our Doctorcoin community who shares our vision for a healthier tomorrow where more people can get health care access to doctors. A lot of this will be discussed on Doctorcoin.com in more detail in the upcoming days, weeks and months. Can visit Doctorcoin.com to get more in depth updates and Doctorcoin information.

Doctorcoin is its own decentralized cryptocurrency entity and does have the benefit of having these strong health care platforms to build awareness. That is, these are different entities but can still network with a common goal of success.

CONCLUSION

To summarize, we envision Doctorcoin cryptocurrency being used for doctor services in the medical and health fields. As a decentralized blockchain cryptocurrency platform, the benefits of crypto Doctorcoin to become a valuable payment option for people seeking doctor services is an exciting and huge opportunity.

Our vision is that DoctorCoin cryptocurrency can perhaps be the golden key alternative for doctor businesses across the globe to provide their services to get paid with. We believe many people that are supporters of the cryptocurrency space, will want to support our crypto Doctorcoin vision.

It is evident that the healthcare industry is very costly, fragmented, has large voids and needs newer cryptocurrency blockchain innovation in the coming years. We believe that cryptocurrency DoctorCoin can become the answer to this large void problem and become a valuable part of the Web 3.0 innovation needed for doctor service needs.

DISCLAIMER

There are always risks on the blockchain or to the networks we use. DoctorCoin assumes no responsibility for anything that may go wrong with the network or blockchain, though we do feel this is a remote possibility. Furthermore, there will be possible changes and evolution of DoctorCoin as needed, with or without notice. By using Doctorcoin, users' agree to take sole responsibility for any resulting loss or gain. The loss of a Smart Wallet with the DoctorCoin currency in it. The loss of the funds due to any kind of external interference by the local government or legislature applied on the user's transactions Inconvenience due to the fact that any associated organization refuses to recognize or accept DoctorCoin as a currency Any change in the value of the funds during conversion into a fiat currency or any other currency subject to an external influence by the global finance market. We reserve the right to update this DoctorCoin Whitepaper as needed, with or without notice.

NEITHER ANY FUTURE SERVICE FOUNDATION (THE COMPANY), ANY OF THE PROJECT TEAM MEMBERS (THE DOCTORCOIN) WHO HAVE WORKED ON THE CRYPTOCURRENCY PROTOCOL (AS DEFINED HEREIN) OR PROJECT TO DEVELOP THE COMPANY PROTOCOL IN ANY WAY WHATSOEVER, ANY DISTRIBUTOR/VENDOR OF COMPANY TOKENS, INCLUDING WITHOUT LIMITATION ETHEREUM PUSH NOTIFICATION SERVICE LIMITED (THE DISTRIBUTOR), NOR ANY SERVICE PROVIDER SHALL BE LIABLE FOR ANY KIND OF DIRECT OR INDIRECT DAMAGE OR LOSS WHATSOEVER WHICH YOU MAY SUFFER IN CONNECTION WITH ACCESSING THIS WHITEPAPER, THE WEBSITE AT [HTTPS://DOCTORCOIN.COM](https://doctorcoin.com) (THE WEBSITE) OR ANY OTHER WEBSITES OR MATERIALS PUBLISHED BY THE COMPANY.

The whitepaper in question is for informative purposes only. We make no warranties or portrayals concerning the fruitful execution of the advancements and innovations as referenced in the paper. Moreover, the execution of the proposition in this report is dependent upon the laws and guidelines of the ward in which such a plan of action will be dynamic.

PROJECT PURPOSE

All contributions will be applied towards the advancing, promoting the research, design and development of, and advocacy for the missing piece of web 3.0 infrastructure with the introduction of the decentralized notification protocol.

The Company, the Distributor and their respective affiliates would develop, manage and operate the COMPANY protocol. The Company is acting solely as an arms' length third party in relation to the COMPANY token sale, and not in the capacity as a financial adviser or fiduciary of any person with regard to the sale of any COMPANY tokens. Any individual buying or selling or trading DOCTORCOIN is not liable for any price action of DoctorCoin. As with any cryptocurrency that is being traded, prices may go up or down frequently.

NATURE OF THE WHITEPAPER

The Whitepaper and the Website are intended for general informational purposes only and do not constitute a prospectus, an offer document, an offer of securities, a solicitation for investment, or any offer to sell any product, item or asset (whether digital or otherwise). The information herein may not be exhaustive and does not imply any element of a contractual relationship.

There is no assurance as to the accuracy or completeness of such information and no representation, warranty or undertaking is or purported to be provided as to the accuracy or completeness of such information. Where the Whitepaper or the Website includes information that has been obtained from third party sources, the Company, the Distributor, their respective affiliates and/or the COMPANY team have not independently verified the accuracy or completion of such information. Further, you acknowledge that circumstances may change and that the Whitepaper or the Website may become outdated as a result; and neither the Company nor the Distributor is under any obligation to update or correct this document in connection therewith. Furthermore, you understand and agree that We may need to change or update the whitepaper as needed. As blockchain technology changes, we may need to evolve or change. You furthermore understand and agree to this.

TOKEN DOCUMENTATION

Nothing in the Whitepaper or the Website constitutes any offer by the Company, the Distributor or the COMPANY team to sell any COMPANY tokens (as defined herein) nor shall it or any part of it nor the fact of its presentation form the basis of, or be relied upon in connection with, any contract or investment decision. Nothing contained in the Whitepaper or the Website is or may be relied upon as a promise, representation or undertaking as to the future performance of the COMPANY protocol. The agreement between the Distributor (or any third party) and you, in relation to any sale, purchase, or other distribution or transfer of COMPANY tokens, is to be governed only by the separate terms and conditions of such agreement.

The information set out in the Whitepaper and the Website is for community discussion only and is not legally binding. No person is bound to enter into any contract or binding legal commitment in relation to the acquisition of COMPANY tokens, and no virtual currency or other form of payment is to be accepted on the basis of the Whitepaper or the Website. The agreement for sale and purchase of COMPANY tokens and/or continued holding of COMPANY token shall be governed by a separate set of Terms and Conditions or Token Purchase Agreement (as the case may be) setting out the terms of such purchase and/or continued holding of COMPANY token (the Terms and Conditions), which shall be separately provided to you or made available on the Website. The Terms and Conditions Documentation must be read together with the Whitepaper. In the event of any inconsistencies between the Terms and Conditions and the Whitepaper or the Website, the Terms and Conditions shall prevail.

CONSIDERED REPRESENTATIONS AND WARRANTIES

By accessing the Whitepaper or the Website (or any part thereof), you shall be deemed to represent and warrant to the Company, the Distributor, their respective affiliates, and the COMPANY team as follows:

In any decision to purchase any COMPANY token you have shall not solely rely on any statement set out in the Whitepaper or the Website;

You will and shall at your own expense ensure compliance with all laws, regulatory requirements and restrictions applicable to you (as the case may be);

You acknowledge, understand and agree that the COMPANY token may have no value, there is no guarantee or representation of value or liquidity for COMPANY token , and COMPANY tokens is not an investment product including for any speculative investment;

None of the Company, the Distributor, their respective affiliates, and/or the COMPANY team members shall be responsible for or liable for the value of COMPANY token, the transferability and/or liquidity of COMPANY token and/or the availability of any market for COMPANY through third parties or otherwise;

doctorcoin

THANK
YOU!
